PROFESSIONAL SUMMARY

Final-year BSc IT student with hands-on experience in web development and emerging AI technologies through academic projects. Strong foundation in programming, database management, and problem-solving with practical exposure to PHP-based applications and AI-driven system design. Familiar with software development best practices and eager to contribute as an entry-level IT professional while continuously learning and growing in a professional environment.

EDUCATION

MSCIT FROM GLS University , Ahmedabad, Gujarat, India | 2023 - 2028

TECHNICAL SKILLS

Programming Languages: Java (Core Java and OOPs), JavaScript, HTML, CSS, Python, TypeScript

Backend & Databases: Node.js, REST API, SUPABASE, MYSQL, MongoDB, Socket.io

AI / ML: ML Model Integration, NLP, Computer Vision, Recommendation Systems, Data Preprocessing, Scikit-learn

Devops & Tools: Git, Apache, Github, Vercel (CI / CD),

Core Competencies: Web Development, AI Integration, Database Management, System Design, Problem-Solving

PROJECT EXPERIENCE

SWITCH = AI-Powered Online Clothing Store with Intelligent Personalization & Style Analysis

- Developed an AI-powered online clothing store featuring intelligent product browsing, AI shopping assistant chatbot, computer vision-based style analysis, outfit matching, and predictive inventory insights using modern web technologies.
- Overcame challenges related to AI integration, image analysis, and intelligent feature implementation.
- Gained practical experience in real-world AI concepts, system design, and scalable application development.
- Implemented end-to-end solution incorporating machine learning models for personalized user experience.

Travel Guide Web Application

- Designed and developed a dynamic Travel Guide web application enabling users to explore destinations, view travel information, and interact with location-based content using PHP and MySQL
- Managed database structure design, backend logic, and form handling to deliver functional web solution
- Strengthened problem-solving skills and understanding of server-side development through hands-on implementation
- Created user-friendly interface for seamless navigation and content interaction
